European standard
wall boxes for simple
in-wall installation

1. An extremely powerful central control device for all NEWPOWER smart devices and intelligent scenes that have smart automated in Smart Life APP, that is explained as ZigBee gateway function and APP remote control.
2. Widely compatible with lights, curtains, air conditioners, and all other smart home devices for central control. Configure Smart Home scenes in the APP, turn on the scene mode with one touch on the screen. No more time required to open APP to find specific device to trigger among so many ones.
3. Four-inch HD LCD, IPS, multi touch screen design, together with auto light sensor, which fits well for modern smart lifestyle, in-wall design is compatible with European standard wall boxes for simple installation within seconds.
4. A good substitute for another NEWPOWER ZigBee gateway at home and directly use the control panel as a gateway for adding NEWPOWER ZigBee devices in App for intelligent controls, up to 100+ ZigBee sub devices available for being added.
5. Language and region optional in the device setting, as well as clock functional with time and date display, even you can check the real-time weather for better life experience
