

MAGNETIC TRACK SPRING SHAPE 2

1. Physical & Mechanical Specifications

Product Type: Magnetic Track Spring Clip.

Body Material: High-strength Metal, Stainless Steel Coated.

Spring Type: Heavy-duty Dual Spring Mechanism.

2. Performance

Application: Provides secure and stable fixation for recessed magnetic track systems.

Compatibility: Suitable for standard recessed 48V magnetic track rails.

Installation: Quick clip-in installation without additional fixing accessories.

3. Protection & Environment

Corrosion Resistance: High resistance to corrosion and oxidation.

Operating Temperature: 40°C.

Indoor Use: Suitable for indoor installations.

4. Installation

Installation Type: Recessed Ceiling Installation.

Function: Ensures firm retention of the magnetic track inside the ceiling cut-out while allowing easy installation and maintenance.

Note: It is recommended to use the spring clip with compatible recessed magnetic track systems to ensure secure installation and reliable performance.
